SUMMARY

Laravel / PHP Developer with 4+ years of experience delivering enterprise and e-governance web applications across financial management, healthcare information systems, and AI-integrated platforms. Architected fund-flow and hospital administration systems handling multi-level approval workflows, role-based access control, and MIS reporting. Extended recent work into Python/FastAPI services for Retrieval-Augmented Generation (RAG), LLM integration, and database-driven intelligence tools. Comfortable owning a feature from database schema through API design to production UI.

WORK EXPERIENCE

Software Developer – In22 Labs (Unwind Learning Labs Pvt Ltd) **Jan 2026 – Present**

Chennai, Tamil Nadu

- Deliver e-governance web applications spanning financial management, healthcare administration, and AI-integrated intelligence platforms across six systems.
- Work across the full stack: Laravel/PHP/MySQL for core application systems, Python/FastAPI for AI-processing services.

NHM Finance / SNA SPARSH – Fund Flow Management System

Laravel, PHP, MySQL

- Architected a fund-flow management system covering three core workflow types: budget allocation, reallocation, and withdrawal.
- Produced MIS reporting across four organizational levels — Treasury, HOA, Agency, and District — feeding real-time financial dashboards.
- Implemented multi-stage approval chains (ROP Approval, Mother Sanction) and beneficiary payment processing.
- Rolled out role-based user management, bulk upload, and data validation to support high-volume financial workflows.

NHM-HMIS – Hospital / Health Management Information System

- Stood up institution management, an institution-facing user portal, and role-based access control from the ground up.
- Engineered inspection and observation workflows, including full inspection-history tracking and status management.
- Redesigned the inspection History Details view into a full-width, responsive table — improved column layout, added status badges and a sticky header, while preserving pagination, search, and export.
- Resolved a duplicate-record bug in history creation and fixed 403 Forbidden errors on inspection attachment images by correcting storage and access-permission handling.
- Shipped institution-wise dashboards, admin configuration, and master-data modules.

TN-FD Knowledge Intelligence Platform

Laravel, Python, FastAPI

- Developed an AI chat and document-search platform combining Retrieval-Augmented Generation (RAG) with LLM integration.
- Added SQL/database intelligence that lets users query structured data using natural language.
- Connected a Laravel front-end/API layer to a Python FastAPI service handling AI processing.

Tender Intelligence / Agent AI

Laravel, Python, FastAPI

- Created a tender search platform with AI-assisted analysis over scraped tender data.
- Automated scraping workflows with status tracking for continuous tender data collection.
- Layered agent-based AI processing on top of database-driven tender intelligence.

NHM-TN PMIS

Laravel, PHP, MySQL

- Set up project/program management workflow modules with role-based user administration.

- Included reporting and dashboards to support ongoing program monitoring.

NHM Nippon
Laravel, PHP, MySQL

- Delivered administrative and user-management modules for a workflow-based application.
- Added reporting features to support administrative oversight.

Web Developer – Divinfosys **Aug 2021 – Nov 2025**
Madurai, Tamil Nadu

- Engineered full-stack web applications using Laravel and React across multiple concurrent client projects.
- Led a development team, owning task allocation and delivery timelines to keep projects on schedule.
- Architected RESTful APIs that connected internal tools with third-party platforms.
- Partnered with design, QA, and product teams to turn requirements into shipped features.
- Maintained version-controlled codebases in Git with consistent branching and code-review practices.
- **AWS Scraper Tool** – web scraping tool using Selenium and MongoDB for structured data collection.
- **Amazon Seller Center** – automation tool using the Amazon SP API to manage listings, prices, and inventory.
- **Eprice Track (Sathya Stores)** – real-time price tracking tool to monitor competitors and optimize pricing.
- **Navilu LMS** – custom CRM-based lead management system (Zoho Bigin integration) for a branded tiles company in Trichy.
- **Project Blue** – integrated Google Campaign APIs to manage and upload leads for digital marketing campaigns.
- **Protocol Hero** – smart task assignment and protocol management system based on user input and location data.
- **Shopyfest** – led backend development and payment gateway integration (Razorpay, PayPal) for a live e-commerce platform.
- **Bea Site (Bharath Electronics)** – front-end and back-end development for an e-commerce platform with responsive UI.

Retail Snacks Distribution Partner – Self-employed **May 2017 – Aug 2021**

- Founded and ran a retail snacks distribution business across four districts in Tamil Nadu.
- Owned vendor relationships, inventory planning, and logistics end-to-end.
- Grew the business through regional networking and customer service before transitioning into web development.

SKILLS

Languages	PHP, Python, JavaScript, HTML, CSS, SQL
Frameworks	Laravel, FastAPI, React (beginner), Bootstrap, jQuery, Alpine.js, Tailwind CSS
Databases	MySQL
Tools	Git, GitHub, Webpack, NPM, Visual Studio Code
Other	REST API Integration, RAG & LLM Integration, Role-Based Access Control, Workflow & Approval Systems, Reporting & MIS Dashboards, Data Validation, Payment Gateway Integration (Razorpay, PayPal)

CERTIFICATIONS

AI Foundations – OpenAI Academy Aug 2026
Claude 101 – Anthropic Aug 2026

EDUCATION

2013 – 2017	B.Tech in Information Technology, **SCSVMV University**, Kanchipuram	GPA: 7.4
2012	Class 12th, **State Board**	70%
2010	Class 10th, **State Board**	90.8%

AWARDS & RECOGNITION

- **Good Job Award** – Amazon Seller Account Handling (May 2023)
- **Good Developer Recognition** – Technical Integration Support (May 2024)
