PROFESSIONAL SUMMARY

Software Developer with 5+ years of professional software development experience (Aug 2021 – Present) building enterprise, e-governance, and web and mobile applications. Backend development with PHP/Laravel and Node.js, web applications with React.js and JavaScript, and a React Native Android app published on Google Play as Team22-HRMS. Experienced in REST API development and integration, MySQL and MongoDB, role-based access control, queue-based background processing, multi-level approval workflows, and MIS reporting. Built Python/FastAPI services for Retrieval-Augmented Generation (RAG), LLM integration, and natural-language-to-SQL features. Hands-on with production deployment, application security hardening, and Android release management.

PROFESSIONAL EXPERIENCE

Software Developer – In22 Labs (Unwind Learning Labs Pvt Ltd) **Jan 2026 – Present**

Chennai, Tamil Nadu

- Deliver e-governance, enterprise, and AI-integrated applications across seven systems using Laravel, Node.js, React.js, React Native, and FastAPI.

Team22 HRMS – Human Resource Management System (Web and Android)

Node.js, React.js, React Native, REST APIs, Google Play Console | Google Play app: Team22-HRMS

- Developed the full stack of a Human Resource Management System: a React.js web application and a React Native Android application backed by Node.js REST APIs.
- Built organization and employee management workflows with role-based access control, and integrated the web and mobile clients with backend APIs and database operations.
- Implemented attendance management with face authentication and geolocation-based attendance.
- Built subscription management with organization-specific user limits.
- Handled production deployment and Android release preparation, and published the app on Google Play as Team22-HRMS.

NHM Finance / SNA SPARSH – Fund Flow Management System

Laravel, PHP, MySQL

- Architected a fund-flow management system covering budget allocation, reallocation, and withdrawal workflows, with multi-stage approval chains (ROP Approval, Mother Sanction) and beneficiary payment processing.
- Built MIS reporting and real-time financial dashboards across four organizational levels: Treasury, HOA, Agency, and District.
- Developed role-based user management, bulk upload, and data validation, with queue-based Laravel jobs for long-running Excel and CSV imports and Supervisor workers for Linux deployment.
- Integrated the Tally accounting system through a service layer with authentication, retry handling, validation, and API request logging.
- Hardened security with custom Laravel middleware (menu-level access control, single-session enforcement, session-integrity checks, SSRF protection, CSP nonces, security headers) and built an OTP-based password-reset service.

NHM-HMIS – Hospital / Health Management Information System

Laravel, PHP, MySQL, Laravel Sanctum, PHPUnit

- Built institution management, an institution portal, and role-based, facility-scoped access control enforced through middleware.
- Developed inspection and observation workflows with full inspection-history tracking and status management, plus institution-wise dashboards, admin configuration, and master-data modules.
- Built token-authenticated REST APIs (Laravel Sanctum) for mobile access, with Firebase Cloud Messaging push notifications for inspection assignments and a scheduled Artisan command for inspection reminders.
- Wrote Artisan commands to import and reconcile district and block master data, and PHPUnit feature tests for authentication, access scoping, scoring, and notifications.
- Redesigned the inspection history view (status badges, sticky header, pagination, search, export); fixed a duplicate-record bug and 403 errors on attachment images by correcting storage and access permissions.

TN-FD Knowledge Intelligence Platform

Laravel, Python, FastAPI, Qdrant, Docker Compose

- Developed an AI chat and document-search platform combining Retrieval-Augmented Generation (RAG) with LLM integration.
- Built a multi-agent natural-language-to-SQL pipeline (retriever, query builder, SQL generator, and synthesizer agents) so users can query structured data in plain language.
- Connected Laravel to the FastAPI service through API service classes, with role-based middleware and guest search limits.

Tender Intelligence / Agent AI

Laravel, Python, FastAPI, Claude API

- Created a tender search platform with AI-assisted analysis over scraped tender data, integrating the Claude API and web-research features through Laravel service classes.

- Automated scraping workflows with run-status tracking, plus keyword-based search and notifications.

NHM-TN PMIS

Laravel, PHP, MySQL

- Set up project and program management workflow modules with role-based user administration, reporting, and dashboards for program monitoring.

NHM Nippon

CodeIgniter 4, PHP, MySQL

- Delivered administrative and user-management modules with reporting for administrative oversight, and developed and revised mobile REST APIs, including changes for a security audit.

Web Developer – Divinfosys **Aug 2021 – Nov 2025**

Madurai, Tamil Nadu

- Built full-stack web applications with Laravel and React across multiple concurrent client projects.
- Led a development team, owning task allocation and delivery timelines.
- Designed RESTful APIs that connected internal tools with third-party platforms.
- Worked with design, QA, and product teams to turn requirements into shipped features, using Git with consistent branching and code-review practices.

Client Projects

- **AWS Scraper Tool** – Web scraping tool using Selenium and MongoDB for structured data collection.
- **Amazon Seller Center** – Automation tool using the Amazon SP API to manage listings, prices, and inventory.
- **Eprice Track (Sathya Stores)** – Real-time price tracking tool to monitor competitors and optimize pricing.
- **Navilu LMS** – Custom CRM-based lead management system with Zoho Bigin integration for a branded tiles company in Trichy.
- **Project Blue** – Integrated Google Campaign APIs to manage and upload leads for digital marketing campaigns.
- **Protocol Hero** – Smart task assignment and protocol management system driven by user input and location data.
- **Shopyfest** – Led backend development and payment gateway integration (Razorpay, PayPal) for a live e-commerce platform.
- **Bea Site (Bharath Electronics)** – Front-end and back-end development for an e-commerce platform with a responsive UI.

EARLIER EXPERIENCE

Retail Snacks Distribution Partner – Self-employed (non-software experience) **May 2017 – Aug 2021**

- Ran a snacks distribution business across four districts in Tamil Nadu (vendors, inventory, logistics) before moving into web development.

TECHNICAL SKILLS

Programming Languages: PHP, JavaScript, Python, SQL, HTML, CSS

Backend Technologies: Laravel (Eloquent ORM, Queues and Jobs, Middleware, Sanctum), CodeIgniter 4, Node.js, FastAPI, RESTful API Development

Frontend Technologies: React.js, Bootstrap, Tailwind CSS, jQuery, Alpine.js, Webpack, Responsive UI

Mobile Development: React Native (Android), Google Play Console Publishing, Android Release Management

Databases: MySQL, MongoDB, Qdrant (vector database)

APIs and Integrations: REST API Integration, Firebase Cloud Messaging, Tally, Amazon SP API, Google Campaign APIs, Zoho Bigin, Razorpay, PayPal, Claude API, Groq API

Deployment and Development Tools: Git, GitHub, PHPUnit, Supervisor, Docker Compose, NPM, Visual Studio Code, Production Deployment

AI and Automation (in applications): RAG and LLM Integration, Natural-Language-to-SQL, Web Scraping (Selenium), Workflow and Approval Systems, Role-Based Access Control, Authentication and Authorization, Reporting and MIS Dashboards, Data Validation, Face Authentication, Geolocation-Based Attendance

AI Tools & AI-Assisted Development: Claude (Anthropic), ChatGPT (OpenAI), Gemini (Google), Google Antigravity, and Groq as development-workflow tools for code generation, debugging, refactoring, technical research and documentation, UI implementation, and agent-based workflows

CERTIFICATIONS

AI Foundations – OpenAI Academy; Claude 101 – Anthropic Aug 2026

EDUCATION

B.Tech in Information Technology, SCSVMV University, Kanchipuram 2013 – 2017 | GPA: 7.4

Class 12th (2012) and Class 10th (2010), State Board 70% | 90.8%

AWARDS AND RECOGNITION

- Good Job Award – Amazon Seller Account Handling (May 2023) | Good Developer Recognition – Technical Integration Support (May 2024)
