PROFESSIONAL SUMMARY

Software Developer with 5+ years of professional software development experience (Aug 2021 – Present) building enterprise, e-governance, and web and mobile applications. Backend development in PHP/Laravel and Node.js, web applications in React.js, and a React Native Android app published on Google Play. Experienced in REST API integration, MySQL database design, role-based access control, multi-level approval workflows, reporting dashboards, and MIS systems. Recent work includes Python/FastAPI services for Retrieval-Augmented Generation (RAG) and LLM integrations. Hands-on with production deployment and mobile release management, and comfortable owning a feature from database schema to API to production UI.

PROFESSIONAL EXPERIENCE

Software Developer – In22 Labs (Unwind Learning Labs Pvt Ltd) **Jan 2026 – Present**

Chennai, Tamil Nadu

- Build and deliver e-governance, enterprise, and AI-integrated applications across seven systems, working across the stack with Laravel/PHP/MySQL, Node.js, React.js, React Native, and Python/FastAPI.

Team22 HRMS – Human Resource Management System (Web and Android)

Node.js, React.js, React Native, REST APIs | Google Play app: Team22-HRMS

- Developed the HRMS web application with React.js and Node.js, and an Android mobile application with React Native for employee and organization workflows.
- Implemented employee management, organization management, role-based access control, and attendance functionality.
- Worked on face authentication and geolocation-based attendance workflows.
- Implemented subscription management with organization-specific user limits.
- Integrated the web and mobile frontends with Node.js REST APIs and database operations.
- Handled production deployment and Android release preparation, and published the app on Google Play as Team22-HRMS.

NHM Finance / SNA SPARSH – Fund Flow Management System

Laravel, PHP, MySQL

- Architected a fund-flow management system covering budget allocation, reallocation, and withdrawal workflows.
- Built MIS reporting and real-time financial dashboards across four organizational levels: Treasury, HOA, Agency, and District.
- Implemented multi-stage approval chains (ROP Approval, Mother Sanction) and beneficiary payment processing.
- Delivered role-based user management, bulk upload, and data validation for high-volume financial workflows.

NHM-HMIS – Hospital / Health Management Information System

- Built institution management, an institution-facing user portal, and role-based access control from the ground up.
- Developed inspection and observation workflows with full inspection-history tracking and status management.
- Redesigned the inspection history view as a full-width responsive table with status badges and a sticky header, preserving pagination, search, and export.
- Fixed a duplicate-record bug in history creation and 403 Forbidden errors on inspection attachment images by correcting storage and access-permission handling.
- Delivered institution-wise dashboards, admin configuration, and master-data modules.

TN-FD Knowledge Intelligence Platform

Laravel, Python, FastAPI

- Developed an AI chat and document-search platform combining Retrieval-Augmented Generation (RAG) with LLM integration.
- Added SQL/database intelligence that lets users query structured data in natural language.
- Connected a Laravel front-end/API layer to a Python FastAPI service for AI processing.

Tender Intelligence / Agent AI

Laravel, Python, FastAPI

- Created a tender search platform with AI-assisted analysis over scraped tender data.
- Automated scraping workflows with status tracking and layered agent-based AI processing on top of database-driven tender intelligence.

NHM-TN PMIS

Laravel, PHP, MySQL

- Set up project and program management workflow modules with role-based user administration, reporting, and dashboards for program monitoring.

NHM Nippon

Laravel, PHP, MySQL

- Delivered administrative and user-management modules, with reporting for administrative oversight, in a workflow-based application.

Web Developer – Divinfosys **Aug 2021 – Nov 2025**

Madurai, Tamil Nadu

- Built full-stack web applications with Laravel and React across multiple concurrent client projects.
- Led a development team, owning task allocation and delivery timelines.
- Designed RESTful APIs that connected internal tools with third-party platforms.
- Worked with design, QA, and product teams to turn requirements into shipped features.
- Maintained version-controlled codebases in Git with consistent branching and code-review practices.

Client Projects

- **AWS Scraper Tool** – Web scraping tool using Selenium and MongoDB for structured data collection.
- **Amazon Seller Center** – Automation tool using the Amazon SP API to manage listings, prices, and inventory.
- **Eprice Track (Sathya Stores)** – Real-time price tracking tool to monitor competitors and optimize pricing.
- **Navilu LMS** – Custom CRM-based lead management system with Zoho Bigin integration for a branded tiles company in Trichy.
- **Project Blue** – Integrated Google Campaign APIs to manage and upload leads for digital marketing campaigns.
- **Protocol Hero** – Smart task assignment and protocol management system driven by user input and location data.
- **Shopyfest** – Led backend development and payment gateway integration (Razorpay, PayPal) for a live e-commerce platform.
- **Bea Site (Bharath Electronics)** – Front-end and back-end development for an e-commerce platform with a responsive UI.

EARLIER EXPERIENCE

Retail Snacks Distribution Partner – Self-employed (non-software experience) **May 2017 – Aug 2021**

- Founded and ran a retail snacks distribution business across four districts in Tamil Nadu, owning vendor relationships, inventory planning, and logistics before transitioning into web development.

TECHNICAL SKILLS

Programming Languages: PHP, JavaScript, Python, SQL, HTML, CSS

Backend Technologies: Laravel, Node.js, FastAPI, RESTful API Development

Frontend Technologies: React.js, Bootstrap, Tailwind CSS, jQuery, Alpine.js, Webpack, Responsive UI

Mobile Development: React Native (Android), Google Play Console Publishing, Android Release Management

Databases: MySQL, MongoDB

APIs and Integrations: REST API Integration, Amazon SP API, Google Campaign APIs, Zoho Bigin, Razorpay, PayPal

Tools, Version Control, and Deployment: Git, GitHub, NPM, Visual Studio Code, Production Deployment

AI, Automation, and Other Technologies: RAG and LLM Integration, Natural-Language SQL Querying, Web Scraping (Selenium), Role-Based Access Control, Workflow and Approval Systems, Reporting and MIS Dashboards, Data Validation, Face Authentication, Geolocation-Based Attendance

CERTIFICATIONS

AI Foundations – OpenAI Academy Aug 2026

Claude 101 – Anthropic Aug 2026

EDUCATION

B.Tech in Information Technology, SCSVMV University, Kanchipuram 2013 – 2017 | GPA: 7.4

Class 12th, State Board 2012 | 70%

Class 10th, State Board 2010 | 90.8%

AWARDS AND RECOGNITION

- Good Job Award – Amazon Seller Account Handling (May 2023)
- Good Developer Recognition – Technical Integration Support (May 2024)
