PROFESSIONAL SUMMARY

Software Developer with 5+ years of professional experience (since August 2021) in full-stack web and mobile application development, covering both backend and frontend work for enterprise and e-governance clients. Works across PHP/Laravel, Node.js, React.js, React Native, Python, and FastAPI, with a focus on REST API development, third-party integrations, role-based access control, and multi-level approval workflows. Built NHM Finance/SNA SPARSH, NHM-HMIS, and the Team22 HRMS web and Android app (published on Google Play), along with AI-powered platforms using RAG, LLM integration, and natural-language-to-SQL. Experienced in production deployment and application security hardening.

TECHNICAL SKILLS

Backend and APIs: PHP, Laravel, Node.js, Python, FastAPI, REST APIs
Frontend and Mobile: JavaScript, React.js, React Native, HTML, CSS
Databases: MySQL, MongoDB
AI Integration: RAG, LLM Integration
Tools: Git

PROFESSIONAL EXPERIENCE

Software Developer – **In22 Labs** (Unwind Learning Labs Pvt Ltd), Chennai Jan 2026 – Present

- Deliver e-governance, enterprise, and AI-integrated applications across seven systems using Laravel/PHP/MySQL, Node.js, React.js, React Native, and Python/FastAPI.
- Own features end to end, from database design and REST APIs to the user interface and production deployment.

Web Developer – **Divinfosys**, Madurai Aug 2021 – Nov 2025

- Built full-stack web applications with Laravel and React across multiple concurrent client projects.
- Led a development team, owning task allocation and delivery timelines.
- Designed RESTful APIs that connected internal tools with third-party platforms.
- Worked with design, QA, and product teams to turn requirements into shipped features, using Git with consistent branching and code review.

Selected client projects:

- **Shopyfest:** led backend development and Razorpay and PayPal payment integration for a live e-commerce platform.
- **Bea Site (Bharath Electronics):** developed the front end and back end of an e-commerce platform with a responsive UI.
- **Amazon Seller Center:** automated listing, price, and inventory management with the Amazon SP API.
- **Navilu LMS and Project Blue:** built a CRM-based lead management system with Zoho Bigin integration for a tiles company in Trichy, and integrated Google Campaign APIs to upload leads for digital marketing campaigns.
- **Eprice Track (Sathya Stores) and AWS Scraper Tool:** built real-time competitor price tracking and a Selenium and MongoDB web scraper for structured data collection.
- **Protocol Hero:** built a task assignment and protocol management system driven by user input and location data.

KEY PROJECTS AT IN22 LABS

Team22 HRMS – Human Resource Management System (Web and Android)
Technologies: Node.js, React.js, React Native, REST APIs. Google Play app: Team22-HRMS

- Developed a full-stack HRMS with a React.js web application and a React Native Android app backed by Node.js REST APIs.
- Built organization and employee management workflows with role-based access control, integrating the web and mobile clients with backend APIs and database operations.
- Implemented attendance management with face authentication and geolocation-based attendance.
- Built subscription management with organization-specific user limits.
- Deployed to production and published the Android app on Google Play as Team22-HRMS.

NHM Finance / SNA SPARSH – Fund Flow Management System
Technologies: Laravel (Eloquent, Queues, Middleware), PHP, MySQL, Supervisor

- Architected a fund-flow management system covering budget allocation, reallocation, and withdrawal, with multi-stage approval chains (ROP Approval, Mother Sanction) and beneficiary payment processing.
- Built MIS reports and real-time financial dashboards across four organizational levels: Treasury, HOA, Agency, and District.
- Developed role-based user management, bulk upload, and data validation, with queued Laravel jobs for long-running Excel and CSV imports, run by Supervisor workers on Linux.

- Integrated the Tally accounting system through a service layer with authentication, retry handling, validation, and API request logging.
- Hardened security with custom middleware (menu-level access, single-session enforcement, session integrity, SSRF protection, CSP nonces, security headers) and an OTP-based password-reset service.

NHM-HMIS – Hospital / Health Management Information System

Technologies: Laravel, PHP, MySQL, Laravel Sanctum, Firebase Cloud Messaging, PHPUnit

- Built institution management, an institution-facing user portal, and role-based access control, with facility-scoped access enforced through middleware.
- Developed inspection and observation workflows with full history tracking and status management, plus institution-wise dashboards, admin configuration, and master-data modules.
- Built token-authenticated REST APIs (Laravel Sanctum) for mobile access, with Firebase Cloud Messaging push notifications for inspection assignments and a scheduled Artisan command for reminders.
- Wrote Artisan commands to import and reconcile district and block master data, and PHPUnit feature tests for authentication, access scoping, scoring, and notifications.
- Redesigned the inspection history view as a responsive table with status badges, sticky header, pagination, search, and export; fixed a duplicate-record bug and 403 errors on attachment images by correcting storage and access permissions.

TN-FD Knowledge Intelligence Platform

Technologies: Laravel, Python, FastAPI, Qdrant, Docker Compose

- Developed an AI chat and document-search platform combining Retrieval-Augmented Generation (RAG) with LLM integration.
- Built a multi-agent natural-language-to-SQL pipeline (retriever, query builder, SQL generator, and synthesizer) so users can query structured data in plain language.
- Connected Laravel to the FastAPI service through API service classes, with role-based middleware and a guest search limit; set up MySQL and Qdrant with Docker Compose.

Tender Intelligence / Agent AI

Technologies: Laravel, Python, FastAPI, Claude API

- Created a tender search platform with AI-assisted analysis over scraped tender data, integrating the Claude API and web-research features through Laravel service classes.
- Automated scraping workflows with run-status tracking, plus keyword-based search and notifications.

NHM-TN PMIS

Technologies: Laravel, PHP, MySQL

- Set up project and program management workflow modules with role-based user administration, reporting, and dashboards for program monitoring.

NHM Nippon

Technologies: CodeIgniter 4, PHP, MySQL

- Delivered administrative and user-management modules with reporting, and developed and revised mobile REST APIs, including changes for a security audit.

EDUCATION

B.Tech in Information Technology, SCSVMV University, Kanchipuram — 2013 – 2017 | GPA: 7.4

Class 12th (2012) and Class 10th (2010), State Board — 70% | 90.8%

CERTIFICATIONS

AI Foundations – OpenAI Academy; Claude 101 – Anthropic — Aug 2026

AWARDS AND RECOGNITION

- Good Job Award – Amazon Seller Account Handling (May 2023)
- Good Developer Recognition – Technical Integration Support (May 2024)

EARLIER EXPERIENCE (NON-SOFTWARE)

Retail Snacks Distribution Partner – Self-employed — May 2017 – Aug 2021

Founded and ran a snacks distribution business across four districts in Tamil Nadu, owning vendors, inventory, and logistics, before transitioning into web development.
